

First MAKE it work!

Then make it right.

A person is standing in a field of tall, green grass, looking up at the sky. The person is wearing a dark shirt and light-colored pants. The sky is a clear, light blue.

Cade Foster

Book Example - <http://www.jfree.org/jcommon/api/index.html>

First make it work

- SerialDate
 - Unit tests were not correct
 - Many mistakes
 - Lots of commented out code and tests
 - Unexecuted code
- So, first...

Then make it right.

- Starting with line 1, ask ourselves: “Does it need to go? Should it be changed? How can it be better?”
- How do we...?

My Examples

AbOut

- ICPC
 - Homework Assignments
- 

Conclusions???
