2015 DB Applications

Project	Description	Client	Technology	Students
Calvary	Create a database to schedule training, track students, assign staff to training activities, assign equipment to students, and assign horses to students. Tables/relations may include: classes, exercises, students, horses, staff, equipment, tent assignments, meals, financial (private).	Keith Herrin, cavtrooper@uscavalryschool.hypermart.net, Michael.k.herrin4.mil@mail.mil, 461-3614 (cell) Owner of U.S. Cavalry School (Ft. Harrison)	Access	• Nikki Espinosa • Jesse Lieberg • Ross Mitchell
Child Protective Services (CPS)	DB that allows CPS supervisors fill out modules which will populate the database and then be able to pull that data back up into the module for updates.	Janice Basso, JBasso@mte.gov 841-2414 (work), 841-2487 (fax), IT Systems Manager, MT DPHHS / CFSD (Helena)	Any	• Stone Deavours • Chad Lacey
Electronic Parts	Check out or buy components using digger card and a bar code reader.	Bryce Hill, BHill@mtech.edu, 496-4752, Professor of Electrical Engineering	Not known	• Jesse Anderson • Mitch Deplazes • Kenny Schmidt
Tech Research Data	Database that would feed institutional research data to an .asp page on the Tech website. Basically, we need to make this page dynamic and feed from a database that Melissa Harrington can manage: http://www.mtech.edu/about/ir/enrollment.htm. Help writing the .asp page would be welcome too.	David Nolt, DNole@mtech.edu, 496-4760 (work), 570-2983 (cell), Web & Social Media Director	Access	• Eddie Johnson • Terry Harrington
