

**Data Mining, CSCI 347, Fall 2019**  
**Homework 4, Perceptron, due Oct. 21**

- Hand execute the first 20 steps of the Perceptron algorithm on the following data. Each time that a new prediction is made, show the line of that prediction, if possible, in order to visualize how the algorithm is working.

Alternatively, program the Perceptron algorithm, outputting the result of each step, and let it run to completion. Show the graph each time that a new prediction is made on the first 20 steps.
