

1. The Agile Manifesto contrasts agile with traditional process models. For instance, agile processes value
“Individuals and interaction” over “processes and tools”.

Similarly, agile processes value:

_____ over comprehensive documentation

_____ over contract negotiation

_____ over following a plan

2. This chapter discusses XP, Crystal, UP, Scrum, Kanban and Open Source process models. Give the process model most appropriate for the following:

Is a family of process models

Means “billboard” or “Visual-board”

Focuses on minimizing the Work In Progress (WIP)

Comes from the Rational Unified Process discussed in the previous chapter

According to the text, currently the most popular agile process model

Requires high discipline and adherence to principles and products

3. Scrum has daily stand-up meetings. What is the purpose of having people stand for these meetings?
