

Software Engineering, EOSF322, Fall 2019
Inspect SRS, Sept. 13

As discussed in class today, everyone should read the entire AbOut SRS. You can find this under the AbOut tab of the course web site.

AbOut itself is also under the AbOut tab. Each of you have been added to the db so will be able to login to AbOut. If you are an admin and want to see what it is like being a faculty, feel free to make yourself active and assign yourself to teaching one or more course offerings. Feel free to make new courses, etc. The scripts for creating the db are also in the AbOut tab, so it will be easy to get the db back to its original state.

On Friday we'll run two inspections, each on different section of the AbOut SRS. I forgot to select moderators for each inspection. I'm rolling 8 die, summing them and taking the mod of the result to get the moderator.

Group 1 will inspect the functional requirements for logging in and being an admin. This starts on page 13 and goes to page 18.

Wyatt Mackubbin
Diedrich Brush - moderator
Eli Hodges
Hunter Boles
Marcus Frisbee
Jackson Jenkins
Burak Adam

Group 2 will inspect the functional requirements for faculty and reports. This starts on page 18 and goes to page 23.

Dalton Caron
Jacob Vesco
Justin Bak - moderator
Xaavan Dolence
Kaleb Brusch
Rhonda Boyle
Jacob Michelloti

Read over the inspection process (under the Resources tab) to be sure you understand what you need to do.

Let me know if you have any questions.
