

**Software Maintenance, ESOF 326, Spring 2020**  
**Endpoints, Jan. 24**

Given the new database structure and permissions, write URIs for expected web-service endpoints, which do not require permissions.

Tasks to consider:

1. List all programs
2. List all outcomes
3. List all outcomes within a program
4. List all courses
5. List all courses within a program
6. List all courses within a program, outcomes within a program mapping
