

Agenda

8:00	Review of last meeting <ul style="list-style-type: none">• Name – Tech Connect?• Business objectives• Vision statement	Andrew Moreno
8:10	Users	Seth Bettwieser
8:15	Scope/environment	John Nelson
8:30	Features	Andrey Zuev
8:50	Next Meeting – use cases – Feb. 25	Andrew Moreno

Business Objectives

- Ability to connect with the Tech Family for professional or social purposes with graduates informally sharing information about potential jobs, internships, events, and start-up opportunities.
- Montana Tech sharing information about post-graduate certification programs, newsletters, blogs, workshops, etc. and providing a portal to other Montana Tech systems, such as Digger Recruiting.
- Encourage and make it easy for alumni and seniors to add data to the system and keep it updated.

Vision Statement

***For** Montana Tech alumni **who** wish to maintain strong networking relationships with other alumni and Montana Tech itself, **the** Tech Connect frontend **is** a web application **that** allows alumni to distribute their information and view the information of others. **Unlike** general social media platforms, our **product** will have the advantage of being the first system created specifically for Montana Tech that allows alumni the ability to connect after they graduate.*

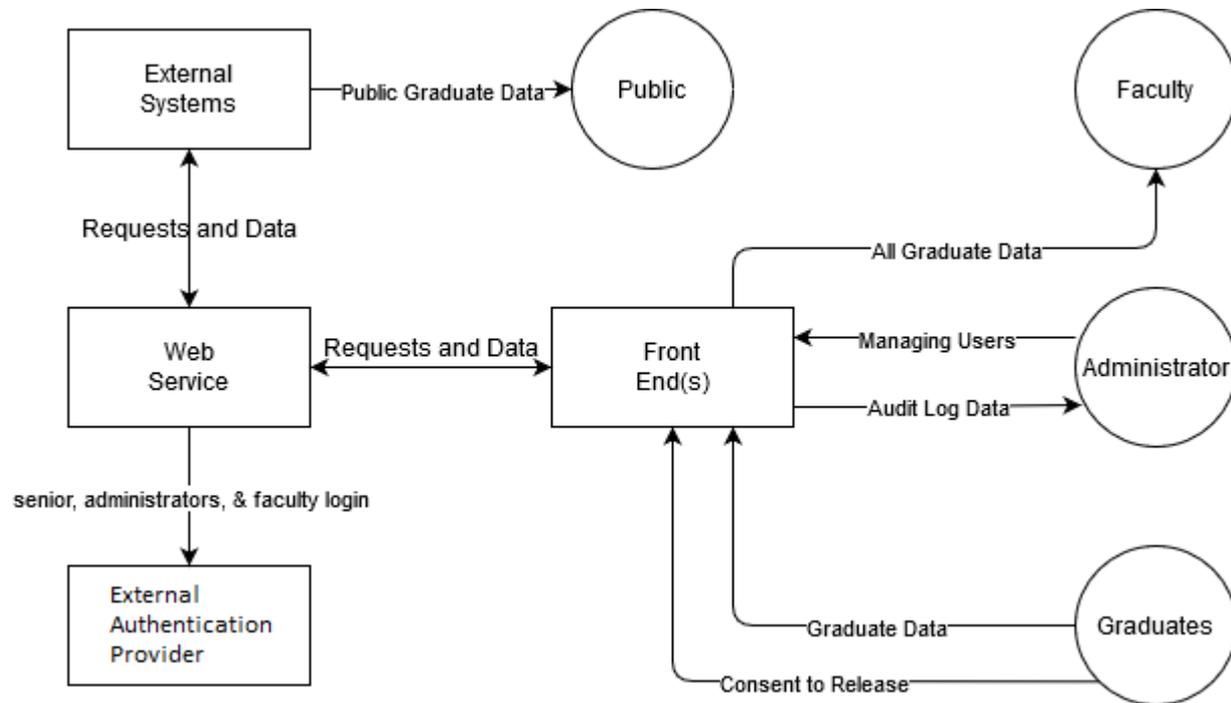

Name – Tech Connect?

- Given the business objectives and vision statement:
 - How does Tech Connect sound?
 - Tech Connect or Tech-Connect?
 - Any other proposals?

Users

- Users can be anyone who interacts with the system, even other systems.
- **Favored Users:** the system is designed with these users in mind.
- **Disfavored Users:** users who shouldn't have access to the system.
- **Ignored Users:** the system is not designed for these users, but they can still access the system.
- **Indirect Users:** users who do not directly access the system, but still interact with it, such as through an API or reports.

Users

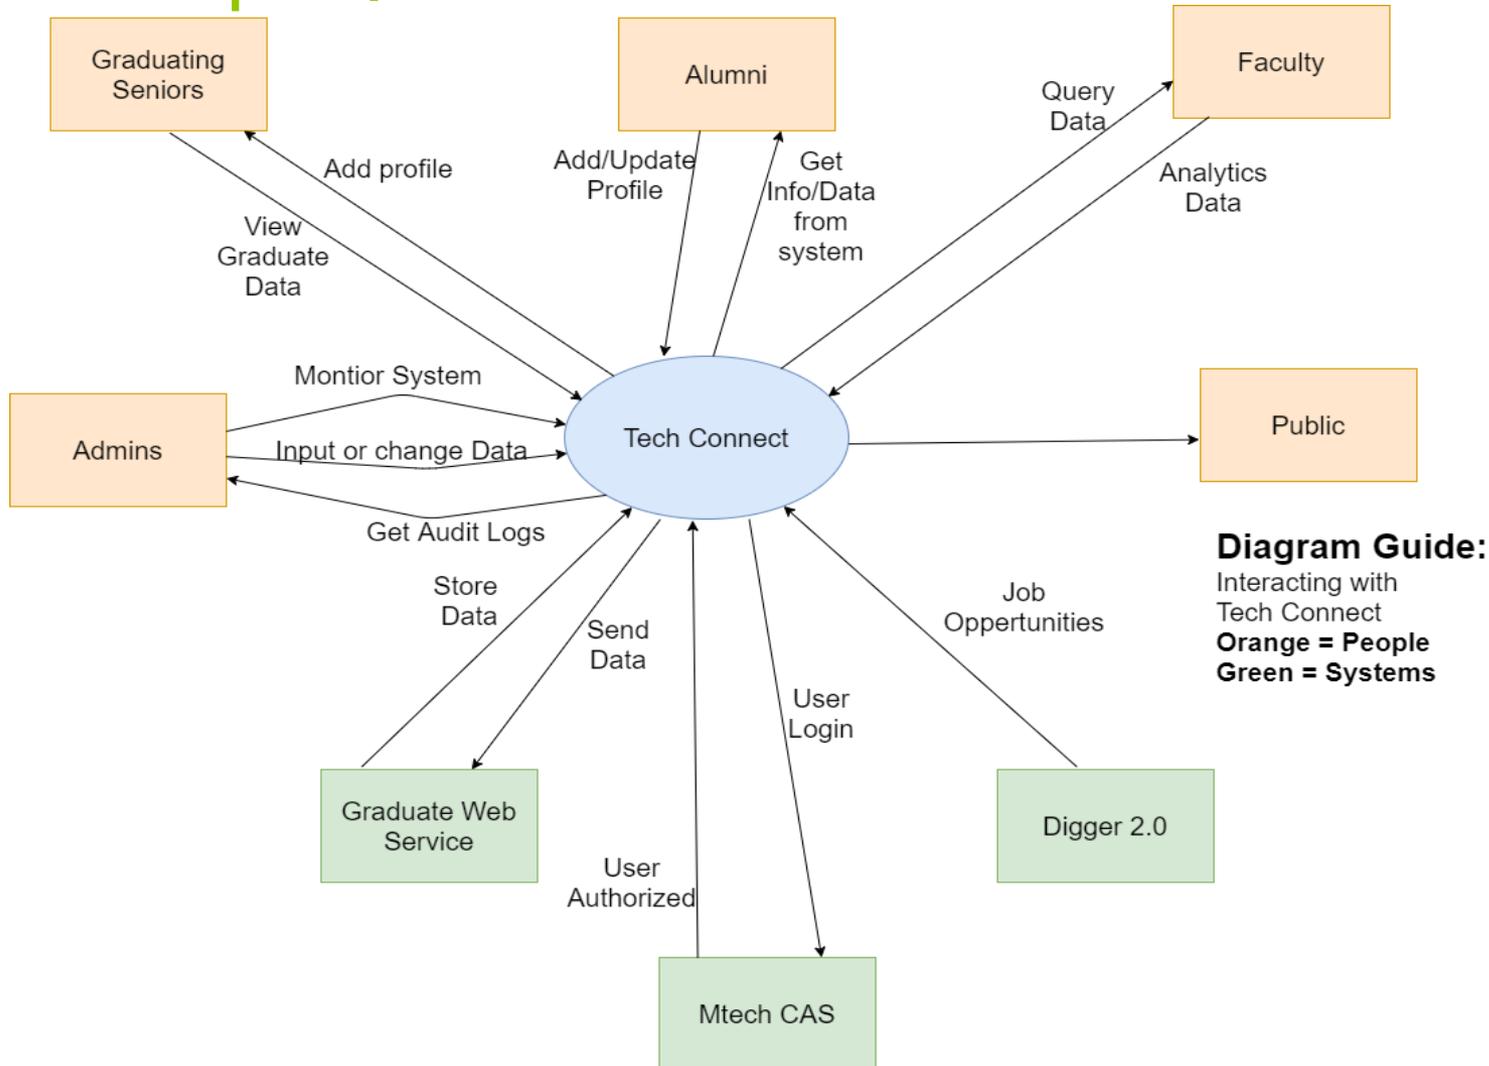

Users

- **Favored Users:**
 - Alumni
 - Graduating Students
 - Administrators
 - Current Faculty
- **Disfavored Users:**
 - Malicious individuals
 - Robots
- **Ignored Users:**
- **Indirect Users:**
 - The general public
 - Undergraduates – some point in the future, not in scope
- **Other:**

Scope/Environment

- **Scope:** Defining the core objectives of what the project is meant to accomplish.
- **Environment:** Defining the systems the software will interact with or be a part of/needed to ensure success.
- Graduating seniors have the same level of access as Alumni
- Alumni have some access to analytics
- Pull data from career services

Scope/Environment

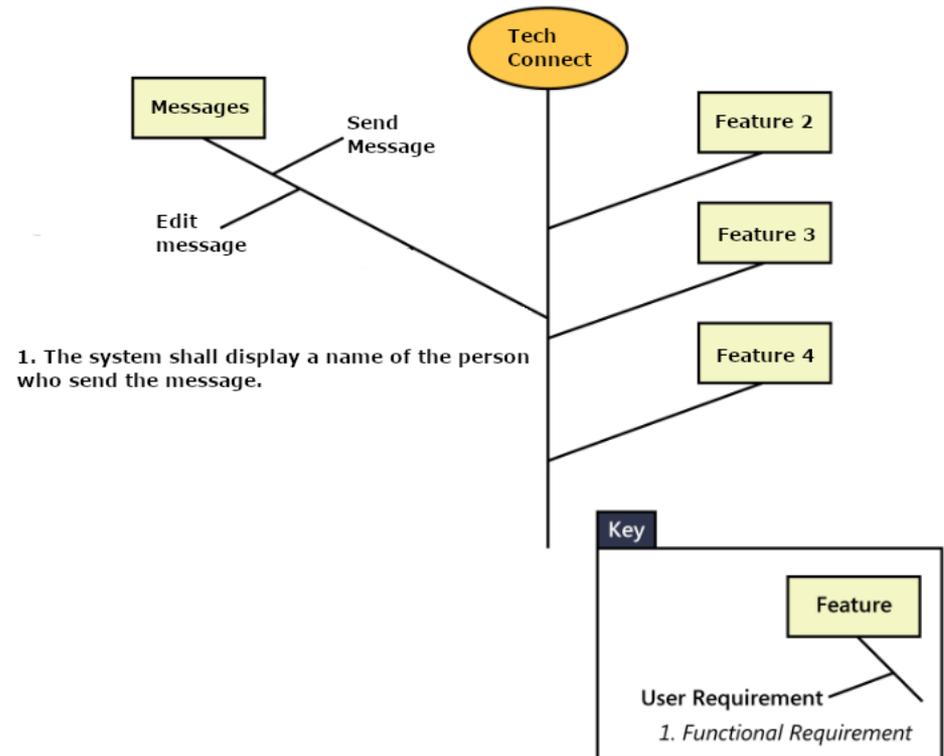

Features

- **Features** are characteristics related to system capabilities that your product or service does or has.
- A **feature** is "higher-level" and usually more focused on meeting business needs.

Features

As an example
for Tech Connect.

Features

Possible ideas:

- Profiles
 - Updating profiles
 - Personalized profiles
 - Consent of information
 - Revoke consent
- User to user connection?
 - Messaging
 - Forums
- Montana Tech to user connection?
 - Newsletters
 - Blogs – subscribe, opt in/opt out
- Analytics

Next Meeting

- Use Cases – February 25th
- Feel free to email us with any questions
- Thank you for coming today!
