

User story:

As a Discord user I would like to send !help within a text channel that the bot is listening to, and receive a display of all commands the bot accepts and how to use those commands.

Story acceptance:

Send !help and verify that the bot replies with a list of all commands the bot accepts, and how to use those commands.

Scenario:

Name: Request help

Description: story above

Actor – Discord user

Precondition: None

Post-condition: List of commands and how to use those commands are displayed.

Scenario:

1. User sends !help
2. List of commands and how to use those commands are displayed.

No alternate paths or exceptions.

Discord user sends

Request help		
Send	Command	!help
Check	Message	7 commands and how to use those commands.

User story:

As a Discord user, I would like to send !play and begin a game of 3D TTT against the bot using the default time-between-moves.

Story Acceptance

Send !play and verify that you have been added to a new game of 3D TTT against the 3DTTT bot in a direct message, and that the time-between-moves is set to a default value.

Scenario:

Name: Play bot, default time-out

Description: story above

Actor – Discord user

Precondition: None

Post-condition: Added to a new game in a direct message and time-between-moves is a default.

Scenario:

1. User sends !play
2. User is in a new direct message and game is initiated.

No alternate paths or exceptions since ill-formed parameters are handled elsewhere.
